The Police Service in Scotland Performance Report

- [Overview/Explanations](#)
- Inter-relationship between the:
 - [Scottish Government/Single Outcome Agreements \(SOAs\)](#)
 - [Scottish Strategic Assessment\(SSA\)](#)
 - [Scottish Policing Performance Framework\(SPPF\)](#)
- [Significant Changes In National Performance](#)
- [Performance Indicators](#)
- [The Policing Landscape: Force strength, land area and population](#)

The Overview/Explanations section is applicable to all of the report and must be borne in mind when viewing statistical information contained in the document.

Navigating through the Report

The report offers a degree of electronic navigation by use of hyperlinks. The text, which offers a hyperlink, has been coloured blue. Links back to the starting point are similarly coloured blue and will appear at either the beginning or end of a section of text or a reference point beside a statistical table.

Overview/Explanations

Data Included

All data is supplied by individual forces and is drawn from their respective databases. These figures are regularly used in other reports such as force crime bulletins and reports to police boards.

It should be noted that due to seasonal variations, fluctuations in performance occur. These fluctuations may be short-term and due to a variety of reasons, such as school holidays, events happening at a particular time in the year, daylight hour changes and operations or initiatives undertaken.

Audit and Accountability

The ACPOS PMBA Performance Reporting Sub Group (PRSG) closely monitors the data in the report and holds forces accountable for the quality of their submissions and examines differences in performance standards to allow the identification of good practice. In addition, indicators are subject to audit either internally or externally.

Commentary

The commentary section in this report will focus on significant variations in performance at a national level and will identify a force(s), which has impacted on the direction of travel nationally. Variations within force figures which may be important to that individual force, but do not impact on the national picture, will not be commented upon.

Points To Note:

- The statistics contained in this report are provisional and subject to change following auditing.
- Where an overall Scotland figure is not shown this is primarily due to not all forces being able to submit data. The following abbreviations/symbols are used throughout the report:

N/A Not available due to force technical issues
N/S Not submitted by a force(s)
~ A comparison / calculation cannot be made due to missing data
∞ Denotes that the calculation grows beyond any assigned value.
- A full explanation of all the counting conventions can be obtained from the technical notes contained within the Scottish Policing Performance Framework Manual. The technical notes are available at <http://www.acpos.police.uk/SPPF/Index.html>.
- The measurements detailed in this report are only the ones where the police are the data providers or have access to the data. The report does not reflect all the measurements within the Scottish Policing Performance Framework (SPPF).
- Figures detailed as per 10K of the population relate to the resident population and does not take cognisance of transient or migratory populations.

Click to return to [Contents](#) page

- Whilst great effort has been made to ensure that the year-on-year change displayed in the tables is accurate, these figures are subject to rounding.
- Currently there is no national standard in relation to incident recording. Consequently, there will be some variation between forces in the extent to which incidents are recorded. Some forces record only those which involve interaction with members of the public e.g. complaints of antisocial behaviour or reporting a crime or road collision. Other forces, in addition to recording those incidents which involve interaction with members of public, also use their IT systems to record non-interaction incidents e.g. abnormal loads, warrants etc.

INTER-RELATIONSHIP BETWEEN SOAs, SSA AND THE SPPF

Scottish Government/Single Outcome Agreements

The purpose is to focus Government and public services on creating a more successful country, with opportunities for all of Scotland to flourish, through increasing sustainable economic growth.

Strategic objectives are:

- Wealthier and Fairer - enable businesses and people to increase their wealth and more people to share fairly in that wealth.
- Healthier - help people to sustain and improve their health, especially in disadvantaged communities, ensuring better, local and faster access to health care.
- Safer and Stronger - help local communities to flourish, becoming stronger, safer place to live, offering improved opportunities and a better quality of life.
- Smarter - expand opportunities for Scots to succeed from nurture through to life long learning ensuring higher and more widely shared achievements.
- Greener - improve Scotland's natural and built environment and the sustainable use and enjoyment of it.

To enable the Scottish Government to meet those strategic objectives each local authority has signed up to a Single Outcome Agreement (SOA). These are agreements between the Scottish Government and each Local Authority which sets out how each will work in the future towards improving national outcomes for the local people in a way that reflects local circumstances and priorities. Further information on the National Performance Framework is available at

<http://www.scotland.gov.uk/Publications/2007/11/13092240/9>

Click to return to [Contents](#) page

Scottish Strategic Assessment

The Scottish Strategic Assessment (SSA) is a prioritised strategic picture of crime and disorder issues currently impacting upon Scottish Communities at all levels. It also includes proposals about the prevention; intelligence and enforcement (PIE) responses that would best address them. This document is produced based on intelligence and information sources from all eight Scottish Police forces, the Scottish Crime and Drug Enforcement Agency (SCDEA), British Transport Police, the UK Borders Agency, the Serious Organised Crime Agency (SOCA) and Her Majesty's Revenue and Customs (HMRC). Open source research is also undertaken and partners are engaged with during the production of this document.

The very high priorities identified in the SSA for 2010/11 are:

- Public Protection
- Terrorism
- Serious Organised Crime Groups
- Antisocial Behaviour
- Violence

Activity undertaken in line with the PIE responses for these areas is monitored through the Scottish Control Strategy with appropriate performance measures identified to assess success in these areas.

Outcome based performance measures reflecting these areas are either currently reported in the SPPF or being developed for future iterations.

Further information on the SSA is available at
<http://www.acpos.police.uk/BusAreas/ScottishStrategicAssessment2010.html>.

Click to return to [Contents](#) page

Scottish Policing Performance Framework

The SPPF is divided into four areas of policing, designed to capture the breadth of police activity.

The four areas are:

- Service Response
- Public Reassurance & Community Safety
- Criminal Justice & Tackling Crime
- Sound Governance & Efficiency

In each of the four areas of policing, High Level Objectives have been identified which reflect the fundamental aims of that area. The performance indicators contained within these areas are divided into Inputs (the resource committed), Activities (the activity or process used) and Outcomes (what is achieved).

There are a number of context measures, which can be used in conjunction with the performance indicators contained within the SPPF. Context measures are not measures of performance, but are designed to provide contextual information of the demands on a police force and the environment they operate within.

It is acknowledged within the police service in Scotland that effective policing is based on sound partnerships. This is reflected in the High Level Objectives within the SPPF. In order to encourage a partnership approach, there are also a number of performance indicators within the SPPF, which should be considered partnership indicators and will rely upon the contribution of a range of partners for successful delivery.

The SPPF structure has also been designed to support the measurement and reporting of local priorities and indicators, in accordance with the principles of Best Value. By incorporating the SPPF in their performance reports, forces can ensure greater consistency and transparency when reporting performance information to Police Authorities and the public throughout Scotland.

The SPPF also complements and supports the delivery of the Scottish Government's Strategic Objectives. It contains the associated national indicators that relate to criminal justice and should be seen as a useful source of performance indicators for inclusion in SOAs.

Significant Changes In National Performance

(commentary)

Complaints about police officers and police staff and Quality of service complaints

Within a complaints case there can be a number of allegations. All complaints are investigated fully and this can be extensive with a number of people being interviewed by the investigating officer. The time spent on investigating a complaint will differ depending on the complexity. In some instances investigations into complaints featured during this reporting period may still be ongoing. This can therefore lead to considerable variations across forces in relation to the number of closed allegations arising from complaints.

A number of strands of work are ongoing through the Police Complaints Commissioner for Scotland (PCCS) and ACPOS to deliver a greater consistency in complaint recording.

Across Scotland, there has been a wide variation in the number of quality of service complaints with some forces experiencing a decrease and others an increase. There would appear to be no obvious trend or area of concern for the increases/decreases. The increase/decrease may be attributed to a greater understanding of the complaints process.

For example Central, who currently has a decrease when compared to the previous reporting period, ensure that any feedback from complaint investigations is used to improve service delivery. Lessons learnt, where they relate to quality of service issues are now publicised within their force. In addition, guidance issued by the PCCS has helped clarify recording procedures and has thus been influential in the reduction noted.

Grampian, who has also decreased, introduced a new enquiry officer's report, which helps explain the difference between quality of service and other types of complaints. This has resulted in increased officer and staff knowledge and experience.

Proportion of 999 calls answered within 10 seconds

Overall Scotland is performing well with the majority of forces exceeding the 90% target of answering 999 calls within 10 seconds.

Time taken to respond to emergency response incidents

The results detailed in respect of this indicator are not comparable due to the fact that response target times differ from force to force as does the criterion that determines what is an emergency response incident. Therefore, no comparison should be made between forces pending the outcome of ongoing work to ensure a standard counting convention.

Handling of non-emergency calls

All forces have experienced a decrease in the number of non-emergency calls. In Strathclyde the increase in abandoned call rate and the reduction in calls answered within 40 seconds could be attributed to changing procedures for Public Service Desk staff and a fluctuation in staff numbers.

Number of recorded crimes and offences and detection rates

Group 7 – Offences (road traffic)

The number of recorded road traffic offences for Fife has decreased notably while it has increased notably in Strathclyde which is affecting the overall picture for Scotland.

In Fife, road policing officers were heavily committed to the management of the roads network in North East Fife for the week of the Open Golf Championship as well as the Leuchars air show. During the reporting period a pilot, 'Community Speedwatch' campaign was running in Fife, which allowed trained members of the community to utilise speed detection equipment to monitor traffic speed. Whilst full evaluation of the pilot is ongoing it is possible that the presence of the volunteers acted as a deterrent.

The increase in Strathclyde road traffic offences is primarily the increased use of fixed penalty notices and takes the force closer to the Scottish average per ten thousand population.

Detection rate for recorded crimes and offences

Group 4 – Fireraising, malicious and reckless conduct

The overall detection rate for this group, whilst slightly higher than the same period last year is still relatively low. Detecting these types of crimes is notoriously difficult as they are often sporadic and impulsive, and one person can commit a number of crimes within a short space of time e.g. a row of cars belonging to individual owners in one street can all be vandalised within minutes.

Dumfries and Galloway has a reasonably high level of detection due to the force being in a position to deploy officers to review crimes, which were undetected. Rural areas tend to have smaller more stable communities who know each other and are more likely to be able to identify perpetrators and provide intelligence. Cities face greater challenges detecting crime due to their size and larger, more transitory populations.

Number of racist incidents, racially motivated crimes & offences and detection rates

The number of racially motivated crimes and offences recorded by Central has increased from the previous year. Analysis undertaken has not identified any trend or pattern.

Number and percentage of reports submitted to the Children's Reporter within 14 calendar days

In recent years, in line with 'Restorative Justice in Scotland ~ Guidelines for Police', forces have adopted different procedures e.g. formal restorative warnings. Additional assessments in the decision making process are now necessary for appropriate disposal, which can be a warning by a police officer, a referral to a partner agency or a referral to SCRA. A number of reports are considered by multi-agency panels, which generally meet weekly to make referrals to SCRA. These changes maximise available resources and ensure that juvenile offenders receive the most appropriate disposal. They have led to a reduction in referrals to SCRA. These changes have adversely affected the submission times for Tayside where reporting times falls short of the 80% target.

Use of police direct measures

At a national level, the number of antisocial behaviour fixed penalty notices (FPNs) issued has increased compared to the previous year. However, this change is driven by Strathclyde as the only force to have experienced an increase in this area. The majority of tickets were issued for offences such as drinking in public, urinating in public and breach of the peace.

Proportion of working time lost to sickness absence

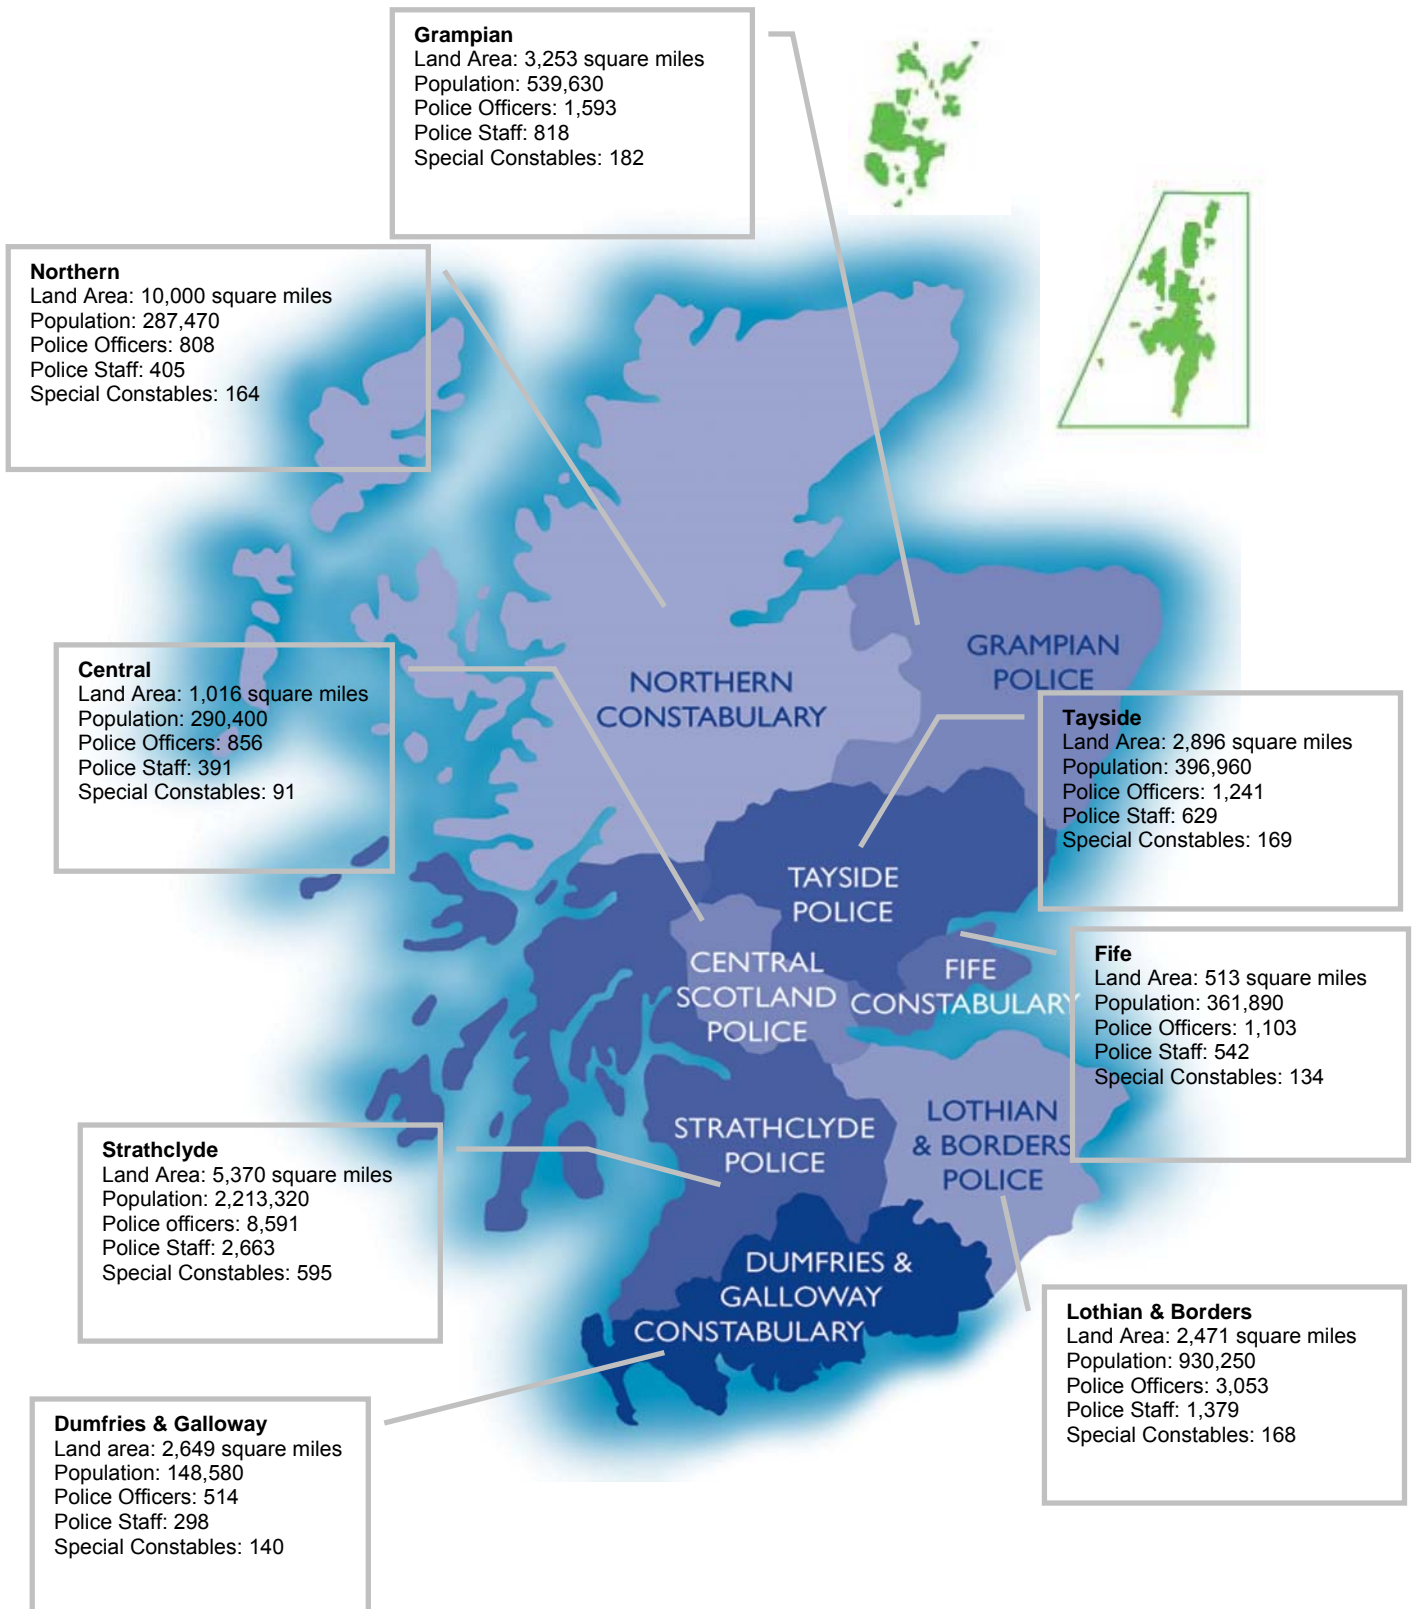

Whilst no Scottish picture is available, Dumfries and Galloway show a notable increase in the proportion of working time lost to sickness absence in relation to police staff. In a force the size of Dumfries and Galloway, one person on long-term sickness absence can impact considerably on the proportion of working time lost to sickness absence.

Number of freedom of information requests and questions

The number of freedom of information requests and the questions contained within the requests can often be determined by what may be topical within the media. The police can only influence the number of requests and questions by routinely publishing standard requests on their internet sites. All forces have experienced a decrease in this reporting period.

- [Time taken to respond to emergency response incidents](#)
- [Handling of non-emergency calls](#)

PUBLIC REASSURANCE & COMMUNITY SAFETY

- [Number of recorded crimes and offences](#)
 - [Group 1 – Crimes of violence](#)
 - [Group 2 – Crimes of indecency](#)
 - [Group 3 – Crimes of dishonesty](#)
 - [Group 4 – Fireraising, malicious and reckless conduct](#)
 - [Group 5 – Drugs and other crimes](#)
 - [Group 6 – Offences \(miscellaneous\)](#)
 - [Group 7 – Offences \(road traffic\)](#)
- [Detection rate for recorded crimes and offences](#)
 - [Group 1 – Crimes of violence](#)
 - [Group 2 – Crimes of indecency](#)
 - [Group 3 – Crimes of dishonesty](#)
 - [Group 4 – Fireraising, malicious and reckless conduct](#)
 - [Group 5 – Drugs and other crimes](#)
 - [Group 6 – Offences \(miscellaneous\)](#)
 - [Group 7 – Offences \(road traffic\)](#)
- [Number of racist incidents, racially motivated crimes & offences and detection rates](#)
- [Number of recorded antisocial behaviour community crimes & offences and detection rates](#)
- [Level of detected youth crime](#)
- [Number of persons killed or injured in road collisions](#)
- [Number of Special Constables and the hours they are on duty](#)

CRIMINAL JUSTICE & TACKLING CRIME

- [Number and percentage of reports submitted to the Procurator Fiscal within 28 calendar days](#)
- [Number and percentage of reports submitted to the Children's Reporter within 14 calendar days](#)
- [Weight of Class A drug seizures and number of supply and possession with intent to supply offences recorded](#)
- [Use of police direct measures](#)

SOUND GOVERNANCE & EFFICIENCY

- Proportion of working time lost to sickness absence
- Turnover rates for police officers and police staff
- Proportion of salary costs accounted for by overtime
- Number of police officers and police staff
- Staffing profile by declared disability, ethnicity and gender
- Expenditure on salaries, operating costs and capital

CONTEXT MEASURES

- Number of telephone calls and incidents
- Number of sudden deaths reported to the Procurator Fiscal
- Number of missing persons incidents
- Number of registered sex offenders in the community
- Number of domestic abuse incidents
- Number of individuals brought into custody
- Number of freedom of information requests and questions

Click to return to [Contents](#) page

SERVICE RESPONSE

This area of policing relates to the quality of service provided by forces in dealing with the public. It covers all aspects of forces' engagement with the public including initial contact, responding to incidents and providing feedback. It also relates to the public's overall confidence in policing.

PUBLIC REASSURANCE & COMMUNITY SAFETY

This area of policing relates to how forces respond to issues that impact on local communities. It includes forces' and their partners' contribution to the prevention, investigation and detection of crime. It also relates to community engagement and the public's overall perception and experience of crime and disorder in their local area.

Number of recorded crimes and offences and detection rates

The number of recorded crimes & offences; the number of recorded crimes & offences per 10,000 members of the resident population and the detection rate for recorded crimes & offences

CRIMINAL JUSTICE & TACKLING CRIME

This area of policing relates to how forces and their partners contribute to the effective and efficient operation of the criminal justice system. It also relates to how forces and partner agencies tackle the issues around national security and serious organised crime.

N.B. As at 1 April 2010, forces no longer report on pensions. The Scottish Government now manages pensions. However, there are areas of finance which forces are still responsible for which were previously recorded under pensions. This expenditure is now being reported within salaries or operating overheads. Guidance on the appropriate area to record this expenditure is under consideration.

Expenditure on operating overheads (£000s)

CONTEXT MEASURES

Context measures are not measures of performance; rather they are designed to provide contextual information to allow better understanding of the demands on a police force and the environment they operate within.
